

IN THE CLAIMS

1. (Original) Party game device including a games' board and a number of flat playing pieces, wherein the games' board comprises a number of playing sections adjusted to the dimensions of the playing pieces, the playing sections having first surfaces comprising first supporting faces for the playing pieces, wherein at least at one side the playing pieces are provided with second surfaces comprising second supporting faces for supportive contact with the first supporting faces, wherein the first and second surfaces comprise edge surfaces situated at the edges of the playing pieces which edge surfaces are spaced apart.
2. (Original) Party game device according to claim 1, wherein the edge surfaces are substantially circumferential, preferably fully circumferential.
3. (Currently Amended) Party game device according to claim 1 ~~or 2~~, wherein the first and/or second supporting faces form a contiguous support surface within the edge surfaces.
4. (Currently Amended) Party game device according to claim 1, ~~2 or 3~~, wherein the edge surfaces of the first surfaces are vertically recessed with respect to other surfaces of the first supporting faces.
5. (Currently Amended) Party game device according to claim 1, ~~2 or 3~~, wherein the edge surfaces of the second surfaces are vertically recessed with respect to other surfaces of the second supporting faces.
6. (Currently Amended) Party game device according to claim 1 ~~any one of the~~

~~preceding claims~~, wherein the games' board is provided with boundaries between the playing sections.

7. (Original) Party game device according to claim 6, wherein the boundaries form raised edges.

8. (Currently Amended) Party game device according to claim 1 ~~any one of the preceding claims~~, wherein the first and/or second supporting faces are bounded by a circumferential edge which is shaped similarly to the circumferential edge of the playing sections and/or the circumferential edge of the playing pieces, respectively.

9. (Currently Amended) Party game device according to claim 1 ~~any one of the preceding claims~~, wherein the playing pieces have a polygonal circumference.

10. (Original) Party game device according to claim 9, wherein the playing pieces have a hexagonal circumference.

11. (Currently Amended) Games' board suitable and intended for a party game device according to claim 1 ~~any one of the preceding claims~~.

12. (Currently Amended) Playing piece suitable and intended for a party game device according to claim 1 ~~any one of the preceding claims~~.

13. (Original) Party game device including a games 'board and a number of flat playing pieces, wherein the games' board comprises a number of playing sections adjusted to

the dimensions of the playing pieces, the playing sections having first surfaces comprising first supporting faces for the playing pieces, wherein at least at one side the playing pieces are provided with second surfaces comprising second supporting faces for supportive contact with the first supporting faces, wherein the first and second surfaces are formed for allowing the second supporting face to tilt with respect to the first supporting face.

14. (Original) Party game device according to claim 13, wherein the first supporting faces form an elevation in the first surfaces, which elevation preferably is surrounded by a lowered step.

15. (Original) Party game device according to claim 13, wherein the second supporting faces form an elevation in the second surfaces, which elevation preferably is surrounded by a lowered step.

16. (Original) Party game device according to claim 15, wherein on both sides of the playing piece such second surfaces have been formed.
